

### Objective

Seeking a software developer position that enables me to contribute to the organization by utilizing my strong academic and analytical skills in a web development environment. Proficient in React, jQuery, JavaScript/ECMAScript(ES6), Node, MongoDB, and mobile-first responsive development with HTML5 and CSS3. Experienced with modern tooling and excited to pick up the right tools for the job.

### Key Skills

- **Language/Markup:** JavaScript/ES6(ECMAScript), HTML5, CSS3/LESS/SASS, Node.js, C#, .Net
- **Framework/Library:** React/Redux, Express, jQuery UI, jQuery, Bootstrap
- **Data/Auth:** MongoDB/Mongoose(NoSQL), MySQL, SQL, CosmoDB
- **Toolkits:** Git, GitHub, REST APIs, Google API, Google Maps API, Single Page Applications, Responsive Mobile-First Design, Mocha, Chai, Jest, Enzyme, Travis CI, Heroku, Netlify, Cloudinary

### Experience

#### Software Engineer

*i4-Insight (9/18 - Ongoing) - Greenwood Village, CO*

- Full stack web developer responsible for end-to-end development using HTML, CSS, React/Redux, C#, .Net and CosmoDB
- Helped Design and Develop both the customer facing application as well as in-house application used by admins.
- One of the only two Frontend Developers on the team during initial launch to help develop new features and create new functionality for the application.
- Worked closely with the team to design and create wireframes and mockups for new features.
- Created several RESTful API's to be used by the front end to perform CRUD tasks.
- Followed Agile and Scrum methodologies for the development of the product.
- Analyzed data, debugging, identifying, reporting, tracking and resolving all issues/defect prior to production.
- Participated in meetings between product owner and company management team companies to decide between frameworks and work implementations.

#### Freelance Web Developer

*(06/17 - 9/18) - New York, NY*

- Meeting with clients to review websites and gather information regarding what tasks needed to be implemented.
- Designed and developed new features for clients using CSS, HTML, JavaScript, jQuery.
- Built custom websites using Bootstrap and helped maintain back-end functionality for clients.
- Developed UI/UX strategies that included wireframes and mockups for clients.

### Recent Projects

#### FitLife:

- FitLife is a fitness tracker that tracks a user's water intake, weight, and daily workouts.

- Allows Users to add their workouts for the day, edit workouts, to delete workouts, to see their progress visually with graphs to chart their weight and water intake.
- Demo: <https://fitlife.netlify.com/>

#### **HouseTracker:**

- HouseTracker is a simple app that allows users to keep track of their prospective houses in an organized manner.
- Users can add/edit and delete properties to their dashboard. Then easily grab a link that they can share with friends and family.
- Allows Users to add houses, edit houses, delete houses of their liking. Allows users to share a link with others of all the houses they are currently tracking.
- Demo: <https://secure-basin-62117.herokuapp.com/>

#### **Fido Finder:**

- The creation of this project was sparked by my own interest of finding adoptable pets that were relatively close to my house and to be able to get locations of shelters as well.
- Uses the Petfinder and Google Maps APIs to find adoptable pets in the location provided.
- Demo: <https://fidofinder.netlify.com/>
